

"Across the South and Around the World"

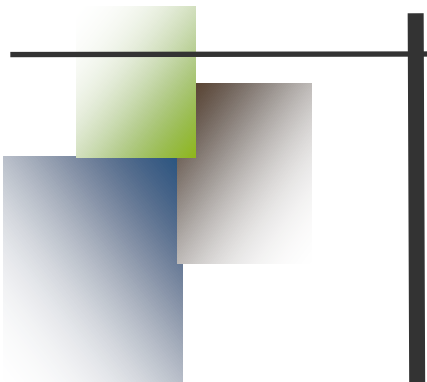

*"We are a company dedicated to
making alternative grease trap
solutions easy, hassle-free
and affordable."*

- Rachael Huggins

BIO-FLOW 407
Grease Trap Treatment

How It Works

This system is set on a timed pump, and is calibrated to run during non-business hours. We place the system in an easily accessible location that is out of the way of normal day operating activity, and make sure that all lines are out of the way of staff. Once installed, the product can last up to three months depending on the size of the grease trap and the frequency of cleaning the grease trap requires.

- Quickly installed
- No installation fees
- Little maintenance required

The system is automated, and changing out the product is quick and easy to do. This product is non-pathogenic and safe for use in kitchens. Once installed, this product works quickly to clean drains, drain lines, and grease traps. This system also does not require prior cleaning of the grease trap

The Advantages

- Eliminates the need for grease trap pumping due to build up
- Prevents grease build-ups and blockages in drain lines
- Safe for use in kitchens
- Will remove any existing build-ups in the drainage system
- Non-Toxic, non-flammable and contains no volatile organic compounds (VOC's)
- Eliminates grease trap, drain, and drain line odors

When used properly this product is extremely effective at cleaning out grease traps, eliminating odors caused by grease build-ups, and eliminating the need for grease trap pumping due to grease build-up. By installing this system, customers could easily reduce the amount spent on grease trap maintenance.

Pricing

1 pump: \$375 *

1 five gallon pail of product: \$108.75 **

* the pump is owned once paid for in full

**shipping and handling is added to this price

What Is It?

Bio-Flow 407 is a premium, all natural mixture of bacteria and dispersants designed for the cleaning, treatment, and maintenance of grease traps, and grease trap systems. The organisms in Bio-Flow 407 were selected for their ability to efficiently break down and degrade fats, oils, and greases, eliminating line blockages and reducing bottom and surface solids from grease traps. This product is also highly effective at eliminating odors caused by grease build-ups and blockages.

The treatment rates will vary depending upon the application of Bio-Flow 407, the size of the area being treated, and the frequency of cleaning that are requires.
